BHASWANTH PACHA

San Jose, CA | +1 (657) 253-6285 | bhaswanth.408@gmail.com | linkedin.com/in/bhaswanthpacha | bhaswanthpacha.github.io

PROFESSIONAL SUMMARY

Software Development Engineer in Test (SDET) with 5+ years of experience building scalable UI and REST API test automation for healthcare, automotive, and telecom systems. Skilled in Java, Python, Selenium, Playwright, Pytest, TestNG, framework architecture, Page Object Model (POM), data-driven testing, and CI/CD quality gates. Improved regression coverage by 40%, reduced flaky test failures by over 75%, and accelerated feedback by 35%. Experienced in validating LLM and agentic AI workflows for reliability, security, and safe failure behavior.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript
Test Automation: Selenium WebDriver, Playwright, Pytest, TestNG, JUnit, Cucumber/BDD, Robot Framework, POM, data-driven testing, cross-browser testing
API, Database & Performance: REST API testing, REST Assured, Postman, JSON Schema, MySQL, PostgreSQL, Oracle, SQL Server, JMeter, Grafana
CI/CD, Cloud & Tools: Jenkins, GitHub Actions, Azure DevOps, Git, Docker, Kubernetes, Linux, Azure, AWS (EC2, S3, Lambda, IAM), Jira, TestRail
Quality Engineering: Test strategy, test plans, regression, integration, end-to-end, UAT, microservices testing, SDLC/STLC, Agile/Scrum, defect triage, release validation, LLM/RAG testing, prompt-injection testing

PROFESSIONAL EXPERIENCE

QA Test Automation & AI Systems Validation Engineer Sep 2026 – Present
Q's Ministry / BHITS, Dominguez Hills, CA

- Owned end-to-end test strategy for an AI cognition-support app spanning mobile, APIs, data sync, and safety flows.
- Built reusable Pytest fixtures for auth, data sync, and AI workflows, automating regression for 30+ API endpoints.
- Blocked unsafe and incorrect AI responses before release by validating LLM and agent output for schema compliance, tool selection, and access control with prompt-injection and hallucination test sets.
- Ran fault-injection tests for network loss, API failures, duplicate events, and crashes to verify safe fallbacks.

Software Development Engineer in Test Jan 2019 – Jul 2024
IBM, Bengaluru, India

- Architected the core Java/Selenium/TestNG and Python/Pytest automation frameworks on Page Object Model and Cucumber BDD that powered UI and API regression for enterprise healthcare, automotive, and telecom applications.
- Expanded automated regression coverage by 40% to 600+ test cases by converting requirements into data-driven functional and end-to-end tests.
- Reduced flaky failures by over 75% (~12% to under 3%), turning an unreliable CI suite into a trusted release gate, through explicit waits, API-driven test data, and thread-safe parallel WebDriver runs.
- Reduced feedback time on code changes by 35% by running UI and API suites in Jenkins, GitHub Actions, and Azure DevOps CI/CD pipelines with Docker containerization and gating merges on results.
- Built Playwright end-to-end tests with network interception, mocking, and traces to diagnose single-page app defects.
- Caught integration and data defects before release by automating REST API tests with Rest Assured and Postman and performing database testing and data validation with SQL.
- Protected major releases from performance and repeat-defect risk by running JMeter load tests, validating canary rollouts in Grafana, and adding a regression test for every defect that reached UAT or production.
- Owned sprint release sign-off by collaborating cross-functionally with development, DevOps, and product stakeholders on triage, debugging, troubleshooting, and test documentation, and mentored junior engineers.

PROJECTS

TestOpsHub – Test Orchestration Platform | *Python, FastAPI, React, Docker, GitHub Actions* Jun 2025 – Aug 2025

- Built a FastAPI/React test dashboard and cut suite runtime from ~20 to ~6 minutes with 4 parallel Docker containers.

BugTracker+ – AI-Driven Issue Management Platform | *React, TypeScript, FastAPI, Azure* Sep 2025 – Mar 2026

- Built a full-stack issue tracker with role-based access, backed by 150+ Pytest tests at ~85% backend coverage.

EDUCATION & CERTIFICATIONS

Master of Science in Computer Science, California State University, Fullerton Aug 2024 – May 2026
Coursework: Applied Algorithms, Software Architecture, Advanced DBMS, Machine Learning, Cloud Computing, Web Application Frameworks, Network Security Fundamentals, Operating Systems, Artificial Intelligence & Robotics

Bachelor of Technology in Information Technology, Sree Vidyanikethan Engineering College Apr 2018

Certifications & Awards: Microsoft Certified: Azure Fundamentals (AZ-900) • AHM 250 Healthcare Management • IBM Excellence Award in Test Automation (2019)
